

DEFOAMER

Product Name-	Defoamer (Silicon Based)
Chemical Name-	Emulsion of Modified Silicon

Specification

Appearance-	Viscous Emulsion
Colour-	Milky White
Type of Emulsion-	Non-Ionic
PH-	6.5 to 7.5
Active contents-	30%
Diluents-	Soft water

Composition (Active Contents)

Stearic Acid-	22.0%
Emulsifier-	4.0%
Silicon-	4.0%
Soft Water-	70.0%

Product Use

Effectively kills foam in low concentration.
Does not have any adverse effect on yeast activity.
Fermentation friendly & reactive.
Easy to dilute with water.
Effective over wide temperature range.
Dose not effect quality of end product.

Packing-	200kg Drum
----------	------------

Self Life-	One year in the original container from the date of product
------------	---

Storage and handling-	It is recommended that normal safety precaution (hand gloves and safety goggles) be taken while handling the product. The material should be in cool place and protect from direct exposure to sun light.
